

Announcing Zoom Dementia Series Workshop:

for Caregivers, Providers, Friends, and Advocates

Nicholas S. Reed, PdD, AuD is an associate professor in the Departments of Otolaryngology-Head & Neck Surgery and Population Health and core faculty at the NYU Langone Health Optimal Aging Institute. He combines his training in clinical audiology (AuD, Towson University) and public health with a focus in epidemiology (PhD, Johns Hopkins University) to approach his research on hearing loss and aging. More narrowly, he focuses hearing aid technology and use in the United States, the association between hearing loss and cognitive decline, dementia, social function, and health care outcomes/interactions (e.g., satisfaction with care, inpatient safety, quality of care, delirium, etc.), as well as whether interventions targeting hearing loss can mitigate these associations.

Hearing Loss and Dementia: from Public Health to Clinical Insights

Thursday, June 12, 2025 -- 10-11:30am Hawai'i time

Dr. Reed will cover:

- The basics of hearing loss and public health
- Hearing loss and age in the United States
- Hearing aid technology and use
- The importance of not ignoring age-related hearing loss, and the benefits of treatment
- Hearing loss and Healthy Aging
- Linking sensory loss to cognition and dementia
- Risk factors for dementia
- Hearing loss as a public health priority
- Tips for addressing hearing loss

Advance Registration is required at this link:
